

# Salesforce PII Data Privacy and Data Residency

No multi-org needed - works with all Salesforce and non-Salesforce customer data

### Isolate

Keep Salesforce data in a secure, isolated environment with privileged access. Use tokens as stand-ins to reduce PII.

### Protect

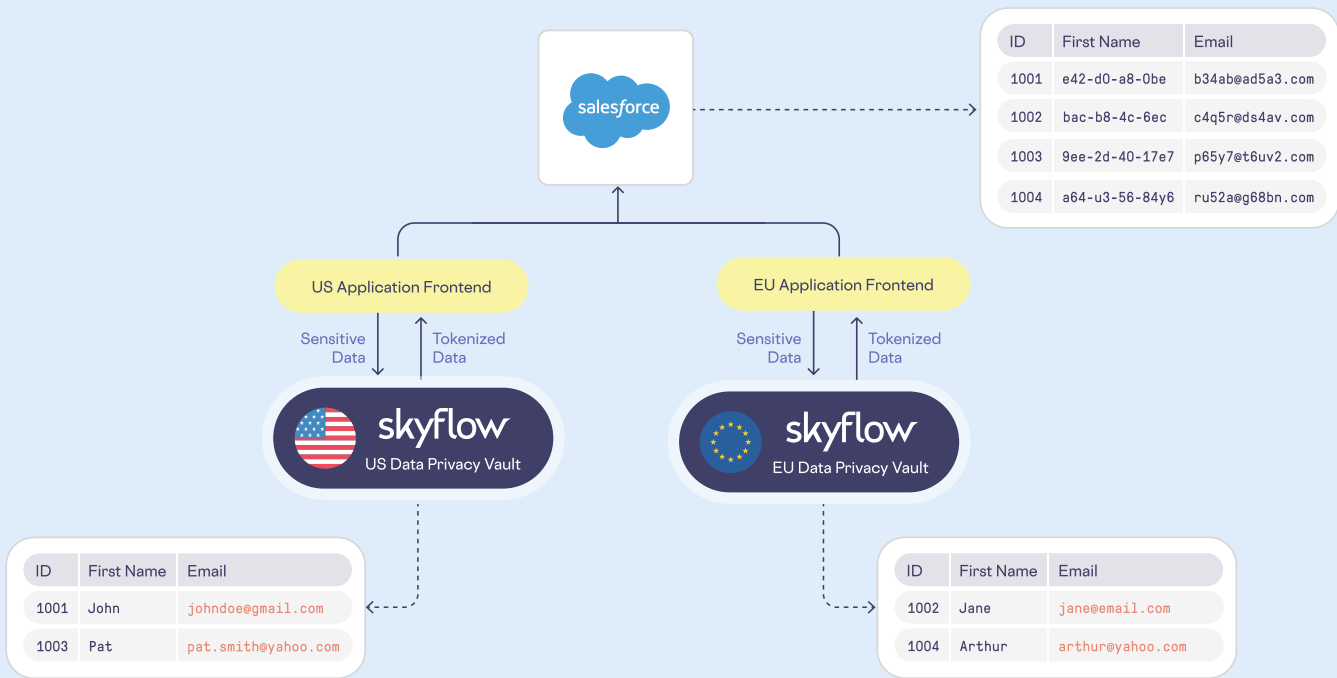

Integrate with third-party services and run workflows while sensitive Salesforce data stays safely encrypted.

### Govern

Build access policies around sensitive Salesforce data within your organization and third parties.

## Data Residency without Multi-Org

Meet multiple data residency requirements by isolating data within legal regional boundaries - in as little as one month.

# Simplify PII Privacy and Data Residency without Multi-Org

## Remove Sensitive Data from Salesforce

Eliminate sensitive data exposure across the entire customer journey with a vault specifically designed to protect the privacy of customer data.

## Data Access without PII Exposure

Execute operations and analytics as you do today without exposing PII.

Before: Customer Record with PII
